

# The Unit's Resources v0.1.0

Ibai Basabe

## Abstract

The Unit is the crypto-native unit of account for the metaverse.  
Here we describe The Unit governance resources in details.

# 1 Introduction

In this document, we describe the distribution of The Unit resources. The Unit is the DAO that governs The Unit's main algorithm and processes to establish an index that can serve as a crypto benchmark and a crypto-native unit of account. For a complete description of The Unit main algorithm, see [B1].

## 1.1 Note about the Usage of this Document

This document has been prepared for information purposes only. It is not soliciting any action from the reader. The contents of this document are subject to change.

## 1.2 Reasons for The Unit

Currently most if not all of the defi protocols use USD as their unit of account.

# 2 Resource Economics

## 2.1 The Blocktree's Resources

The Unit governance token is the controlling voting unit governing The Unit algorithm. The maximum amount to ever enter circulation is  $2^{33}$  The Unit governance tokens.

Figure 1: Total allocation.

## 2.2 Allocation

We allocate The Unit's resources as shown in Figure 1.

## 2.3 Vesting

An amount of the initial The Unit's resources will be vested for the times defined in Figure 2. Founders, Early Development, Seed, and Development Fund will have vesting schedules. For a base 10 allocation schedule with inflation rates see Figure 3.

## 3 Development Roadmap

### 3.1 Milestones

The Unit’s ideas started in 2018; however, the Unit was not as necessary in the crypto space today. Therefore, the project began in 2020, and in 2021 it is running strong towards executing the plan.

We first launched The Unit algorithm online on May 5, 2021 (5/5/5). We are working on two-week blocks improving the functionality and every aspect of the product.

We are preparing a Uniswap proposal to include The Unit as a unit of account in their prices.

## 4 Final Remarks

The Unit.
